

TRIBUILT® Self Adhering High Temperature Underlayment

TRIBUILT® Self Adhering High Temperature Underlayment is a SBS modified bitumen high-temperature roofing underlayment reinforced with a textured skid-resistant polyethylene film. The membrane is specifically designed to be self-adhered on sloped roof surfaces as secondary seal under metal, shingles, or tile.

- Self-Sealing when penetrated by mechanical fasteners or roofing nails
- 40 Mils Thick
- Fully adhered system prevents lateral moisture migration
- Premium skid-resistant textured blue film surface
- Split release backing for fast application
- Can be installed in the Southwest
- No box, which means less jobsite waste
- Meets ASTM D1970 standard
- Can be installed over Plywood, OSB, Wood Plank, Wood Composition, Concrete, Gypsum Board Sheathing, Glass Faced Gypsum Sheathing, Metal, and Masonry
