

SLIDING PATIO

TRI-BUILT
TRI-BUILT® MATERIALS GROUP, LLC
CUTTINGEDGE II
REPLACEMENT WINDOWS - PLUS SERIES

FEATURES

- 1 1" IGU glass systems offer energy-efficient InsulEdge standard and optional InsulEdge+ for improved performance
- 2 Custom-fit interlock system provide extra protection against air infiltration for enhanced energy performance
- 3 Our doors glide on over-sized tandem steel rollers and provide smooth and effortless operation
- 4 A heavy-duty vinyl sill with a stainless steel roller guide delivers superior strength, resists frost and condensation
- 5 Anti-take-out device in the head of every door makes it virtually impossible to remove the active panel even with the rollers in their lowest adjustment position providing comfort and peace of mind
- 6 While TRI-BUILT® CUTTINGEDGE II Plus Replacement patio doors come standard with a rugged locking system, for optimum security, choose our optional dual-point lock and/or our optional footbolt lock with vent latch position
- 7 Available on TRI-BUILT® CUTTINGEDGE II Plus Replacement patio doors, optional pet resistant screen is seven times stronger than standard insect screening and offers excellent outward visibility, is made from vinyl-coated polyester and is not harmful to pets
- 8 Constructed of New Generation uiPVC vinyl for enduring beauty with fusion-welded panels for added strength and durability

Oversized tandem steel rollers for smooth, effortless operation. Access to adjustment screw for ease of panel alignment through exterior face of panel eliminates unsightly screw caps on the interior and ensures proper operation.

1. Most 6' sliding doors meet a Design Pressure (DP) rating of 30 and most 8' sliding doors meet a Design Pressure (DP) rating of 25 (with Energy Upgrade).
