

1000 DOUBLE HUNG WINDOWS. We've spared no detail with these top-of-the-line replacement windows. The energy-efficient construction keeps your home snug and dry, and the highly engineered balance system means your sash will lift easily, every time. But what you'll notice most when you add these elegant classics to your home is their enduring style.

1000 DOUBLE HUNG

FEATURES

1. Dual wall flush fin for enhanced strength and enduring beauty
2. Maintenance-free multi-chamber New Generation PVC vinyl construction with fusion-welded corners for durability, weather-tight performance and beauty
3. Equal sightlines for traditional wood window aesthetics
4. Aluminum extruded half screen with fiberglass mesh
5. Tilt latches keep sashes secure and allow for easy tilt-in of the sashes for simple and safe cleaning of windows
6. Standard InsulEdge spacer system and PG glass package reduces energy costs; optional InsulEdge+ spacer system provides enhanced performance
7. High-security flush mount cam-action sash locks (two are standard on all windows over 25" wide) and full interlocks with double weatherstrip provide airtightness and added security
8. Patented X-Core insulation in frame adds energy-efficiency
9. Solid top and bottom lift rails for convenient easy operation; our unique weatherstripped sill with SilLock design ensures long-term performance
10. Ventilation limit latch enables window to vent in a partially open position
11. LC30 rated for light commercial application
12. I-Force reinforced meeting rails on double hung and sliding windows with Energy Upgrade features internal structural fiberglass extrusions for reinforcement along with an integral interlocking system, providing unsurpassed strength and durability without conduction

A Flush-mounted cam-action locks

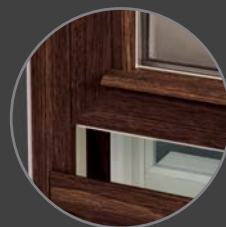

B Ventilation limit latches

C I-Force fiberglass-reinforced sash meeting rails on units configured with optional Energy Upgrades

D Ergonomically designed tilt-latch for ease of cleaning

E Top and bottom lift rail for ease of operation
