

## TRI-BUILT® ROOF X TENDER® RX 100 Rubberized Ultimate Flashing Cement

TRI-BUILT ROOF X TENDER® 100 Ultimate Rubberized Flashing Cement: The all-purpose repair and flashing cement developed for the year-round demands of commercial roofers. This rubberized SBS mastic lasts longer in all climates, applies faster and spreads easier than leading roof cements. It is the ideal solution for re-sealing seams, splits, holes and cracks in gravel surfaced BUR, smooth BUR, SBS modified cap sheets, and asphalt shingle roofs. Sealing base flashings and roof projections has never been easier with superb tooling around skylights, HVAC curbs, vent pipes, gravel guards, scuppers, drains, metal flanges and cracks in structural concrete. Made with new advances in asphalt technology, ROOF X TENDER®100 contains advanced adhesion additives for excellent bonding to wet surfaces and even works under ponded water. With superior water-resistant properties and durability, ROOF X TENDER® 100 is also an excellent damp-proofer for below-grade exterior foundation walls.

- Ultimate Rubberized Flashing Cement
- Apply In Wet or Dry Conditions
- Can Be Applied Under Ponding Water
- For Sealing Seams, Splits, Holes, Cracks, Roof Penetrations, Scuppers, Drains, Metal Flanges and Cracks in Structural Concrete
- Use Over Gravel Surfaced BUR, SBS Modified Cap Sheets and Asphalt Shingles
- Excellent Damp-Proofer For Below-Grade Exterior Foundation Walls
- Application: 3 Course System: 1/8" thick of cement, Tri-Built Polyester Reinforcement, 1/8" thick of cement
- Available in Summer, Intermediate & Winter Grade
- Full Cured 30 days (50% Relative Humidity, 70F)
- Skins Over in 4-8 Hours (50% Relative Humidity, 70F)
- Available in: 10.3 oz Tubes, 1, 3 & 5 Gallon Buckets
- Miami Dade Approved
